

SOFTWARE AND SECURITY ENGINEERING · HARARE, ZIMBABWE

We build the systems your business runs on. Then we prove they hold.

Vanorika Technologies is the software and security practice of Donovan Mudarikwa. We build websites, custom software and apps, and we test systems the way an attacker would before they go live. Founder led: you work directly with the engineer who does the work, for clients in Zimbabwe and abroad.

BUILD**Websites, software and apps**

Business sites, booking and inventory systems, portals, mobile apps and automation of repetitive work.

SECURE**Testing done by hand**

Security audits, penetration tests, mobile, AI and code reviews, each with a written report and a retest.

COMPLY**Data protection readiness**

Where you stand under the Cyber and Data Protection Act [Chapter 12:07], and the technical work to close the gaps.

BASED IN**Harare, Zimbabwe****WORKING HOURS****UTC+2**, overlapping the UK, Europe and US East Coast mornings**CREDENTIALS****CompTIA PenTest+**
CompTIA Security+**ENGAGEMENT****Written scope and one fixed quote** before work starts

WHO WE ARE

The person you talk to is the person who does the work. From the first call to the handover.

Donovan started on the side of technology most builders never see: testing systems that were never meant to let an outsider in. Penetration testing means thinking like an attacker and finding the holes in a business's software before a criminal does.

Doing that work again and again shows a pattern: most software is built to look right, and far less of it is built to hold. Vanorika exists to close that gap. Build the system, then test it the way an attacker would before it goes live.

Donovan Mudarikwa, founder and lead engineer, runs every project personally, builds and tests alike. CompTIA PenTest+ and Security+. Remote by default, with scope, decisions and updates kept in writing.

HOW WE WORK

A written scope

What will be built or tested, and what will not, before anything starts.

One fixed quote

No hourly billing. Anything outside scope is quoted in writing first.

50% to start

A 50% commitment fee books the slot; the balance on completion or agreed milestones.

You own it

Source code, domains, hosting accounts and documentation are handed over to you.

HOW A PROJECT RUNS

01	02	03	04	05
A short call	Written scope	The work	Handover	After launch
20 to 30 minutes, no commitment.	What, by when, and a fixed price.	Weekly written updates on builds.	Websites in one to two weeks. Pentest reports in five to seven working days.	The same engineer for questions and fixes.

PAYING

Local and international, in US dollars

EcoCash, InnBucks or OneMoney, USD bank transfer (local or international), and card or Wise for clients paying from abroad. Every payment carries the quote or invoice number as its reference.

CONFIDENTIALITY

Your findings stay yours

Security clients are never named and their findings are never published. We sign your NDA before scoping, on request, and only test systems with the owner's written authorisation.

FREE TOOLS ANYONE CAN RUN FIRST

[WEBSITE SECURITY CHECK](#)[SECURITY HEADERS CHECKER](#)[TLS PROTOCOL CHECKER](#)[COOKIE AND PRIVACY SCANNER](#)[POTRAZ LICENCE CHECKER](#)[SPF AND DMARC GENERATOR](#)[PENTEST PRICE BUILDER](#)[PROJECT COST ESTIMATOR](#)[BREACH COST CALCULATOR](#)

All at vanorikatechnologies.co.zw/tools. Read only and passive: nothing is attacked.

Websites, software and apps. Every one built to be tested.

STARTER

\$250 once off

Up to 5 pages, built for phones first, contact form and WhatsApp button, Google search basics. 1 month of support.

BUSINESS

\$600 once off

Up to 15 pages you edit yourself, online shop for up to 100 products, blog and email signup. 3 months of support.

SYSTEM

\$1,200 once off

Customer accounts, admin dashboard, Paynow, EcoCash or card payments, security hardening before launch. 6 months of support.

CUSTOM

Quoted

Mobile apps, portals and anything that does not fit a box, scoped after a short call.

SOFTWARE, APPS AND AUTOMATION

- | | | |
|----|---|------------------------|
| 01 | Custom software
Booking, inventory, portals, admin dashboards and internal tools shaped to how you work, with APIs and integrations to the systems you already use. | From \$1,200 |
| 02 | Mobile apps
Android and cross platform apps for your customers or your team, with offline support, push notifications and app store deployment. | From \$800 |
| 03 | AI and automation
Chatbots, workflow automation and AI integrations that take document handling, follow ups and reporting off your team. | Quoted |
| 04 | WhatsApp enquiry ads
Facebook and Instagram ads that open a WhatsApp chat with you, run and reported monthly. Ad budget paid to Meta separately. | \$150 to \$500 / month |

AFTER LAUNCH: CARE PLANS, WITH THE LIMITS IN WRITING

Website maintenance

Updates applied and tested, backups checked with a quarterly restore test, small content changes and fixes, a monthly note of what changed.

Quoted

Application maintenance

Security updates, bug fixes, database backups and error log reviews for web apps, portals and booking systems.

Quoted

Security monitoring

Your site and domain watched, a monthly re-scan and report, updates kept current.

From \$150 a month

Hours: Monday to Friday 08:00 to 18:00 and Saturday 09:00 to 14:00, Harare time. No 24/7 cover and no guaranteed incident response time on any plan.

LAUNCH BUNDLE

A Business website plus three months of Grow ads pointing buyers at it and at your WhatsApp: one plan, one price, from launch to your first enquiries. **\$1,350.**

Find the gaps before someone else does. Tested by hand, written up so you can fix it.

WEBSITE SECURITY AUDIT

From \$500

A full vulnerability assessment of your website, with fixes ranked by priority.

PENETRATION TESTING

From \$1,200

Manual testing of web apps, APIs and networks, a written report and a retest, fixed before testing starts.

SECURITY RETAINER

From \$150 a month

Monitoring of your site and domain, a monthly re-scan and report, updates kept current.

SPECIALIST TESTING AND RESPONSE, QUOTED AFTER SCOPING

Mobile app security

Android and iOS apps and their APIs: on device storage, network security, backend and reverse engineering risk, aligned to OWASP MASVS.

AI and LLM application security

Prompt injection, data leakage, unsafe actions and abuse, aligned to the OWASP Top 10 for LLM Applications.

Source code security review

Scanning, then manual triage of the risky code, secrets and dependencies, with fixes verified rather than scanner output.

OSINT exposure assessment

Your domains, lookalikes, email spoofing, leaked documents and brand impersonation. Passive, authorised, and nothing is attacked.

Account takeover recovery

A hijacked business Facebook, Instagram or WhatsApp account, worked through the platform's official recovery and locked down.

Response and protection

Incident response retainer, breach and credential monitoring, phishing simulation and awareness, executive digital protection.

METHOD, EVERY ENGAGEMENT

01	02	03	04	05
Scope	Authorise	Test	Report	Retest
What is in and out, agreed in writing.	Written permission from the owner first.	By hand, never destructive.	Findings by business risk, each with its fix.	Every fix checked before you close it.

TESTED AROUND WHAT YOUR SECTOR HAS TO PROTECT

Schools and colleges

Learner records, fee payments and parent portals, often holding data about minors.

Clinics and healthcare

Patient records and health data the law treats with special care.

Law firms

Client files and privileged correspondence.

Travel agencies

Passport details, bookings and payments.

Finance and fintech

Accounts, money movement and logins.

NGOs

Beneficiary and donor data across partners.

The Cyber and Data Protection Act applies to you whether or not anyone has come knocking.

What we do

- Map where personal data actually lives in your business
- Review encryption, access control and hosting
- Test whether you would detect and survive a breach, and write the runbook
- Check processors: payment gateway, hosting, email, outsourced developers
- Check your website's privacy notice, cookies and consent against what you actually do

What we do not do

- We are not a law firm and do not give legal opinions
 - We do not issue licences or act as anyone's Data Protection Officer
 - We hold neither a DPO certification nor a data controller licence, and will say so and point you to someone who does
- Under SI 155 of 2024, organisations processing the personal data of 50 or more people need a POTRAZ data controller licence. Check where you stand with the free POTRAZ licence checker.

An AI receptionist that answers every call. Missed calls are missed bookings.

- A natural voice assistant answers on your number, any time
- Books appointments into your Cal.com calendar, with a confirmation text to the caller
- A text summary to you after every call
- Tells every caller it is an AI assistant and that the call may be recorded

STARTER

\$297 a month

GROWTH

\$497 a month

Plus a one time setup fee of \$250. Growth adds text back on hang ups and day before reminders. Ten test calls together before going live.

One system for the whole business. Built for Zimbabwe.

An all in one business operating system in development: accounting, invoicing, HR and payroll, CRM and a casino suite, with an AI Copilot. Designed around USD and ZWG dual currency, ZIMRA reporting and EcoCash reconciliation. A live demo shows where each module stands today.

SME

\$49 a month

Accounting, invoicing and CRM, up to 10 users.

ENTERPRISE

\$99 a month

Adds HR and payroll, unlimited users, ZIMRA reporting.

CASINO SUITE

\$200 a month

Floor, cashier and gaming levy reporting for licensed casinos.

Planned early access pricing; a small number of businesses are onboarded first.

SELECTED WORK

Real sites for real businesses. Security work by outcome only.

Pearlsard Travel and Tours

HARARE · WEBSITE AND BOOKING SYSTEM

- Trip search and destinations
- Packages with per person pricing
- Enquiry and booking flow

Intrachem Mining and Logistics

SOUTH AFRICA · BRAND AND WEBSITE

- Logo and brand system
- Four divisions, one partner
- Quote requests from every page

Beauty by Nyasha

CENTURION · WEBSITE AND SHOP

- Online shop with checkout
- Treatment menu and pricing
- Appointment booking

CONFIDENTIAL SECURITY ENGAGEMENTS

Online platform

Web application tested by hand before a public launch. Every serious issue fixed and retested before go live, with a full remediation report.

Services business

A passive assessment of what its websites and email setup gave away, mapped to a fix it roadmap; top fixes made the same week.

Luxury salon, Harare

Booking, payments and customer data secured before launch. Every finding resolved; launched clean.

START A CONVERSATION

Tell us what you need built or tested.

You talk to the engineer who does the work. A written scope and one fixed quote before anything starts. We reply within one working day.
